

Pharmacy OS — Quick start

Point of sale · Inventory · Accounting · HR · Controlled drugs · Version 1.0

1 · Install (shared hosting, no shell needed)

1. Upload the zip and unzip it into a folder, e.g. `pharmaos/`.
2. Open `http://your-host/pharmaos/seedings.php`.
3. Click **Run install** — migrations, reference data, company and the admin user.
4. Click **Load demo data** — catalogue, stock, customers, a year of sales and the staff below.
5. Sign in at `index.php` with one of the logins under “Sample logins”.
6. Install your licence token on the **Licence** screen (or `php app license:install` if a shell exists).
7. **Delete** `seedings.php` **before going live**.

2 · Your first ten minutes

1. Sign in as `k.yousif` (cashier) and open **Point of sale**.
2. Scan a barcode — or type `6291...` and press Enter — the item lands in the basket.
3. Press **F8** to take the payment; the receipt prints.
4. Sign in as `h.idris` (accountant) and open **Accounting** — a year of entries is already there.
5. Sign in as `admin` and open **Reports** — pick a report, read the chart, export or queue it.

3 · Quick notes

Do

Run a backup and then

Verify

it before any change you are unsure of. A verified backup is the only kind that counts.

Do

Keep the hourly heartbeat cron (`php app license:heartbeat`); it is what keeps the licence current with almost no cost.

Check first

Attach a patient before the first item at the till so the clinical check reads allergies and interactions against a real person.

Check first

A scan that matches nothing falls back to a name search — read the message under the box; it says which happened.

Danger

Restoring a backup overwrites the live database and cannot be undone. Tick the confirmation box only when you mean it.

Danger

Controlled stock lives only in the cabinet; a movement without the checked-in authorised pharmacist is held and reported.

4 · Sample logins

USERNAME	PASSWORD	ROLE	WHAT TO LOOK AT
admin	Khartoum-2026-x	Owner / super admin	Created by the installer — everything is open.
h.salma	Demo-2026	Senior pharmacist	Controlled-drugs responsible; can authorise the cabinet.
m.tariq	Demo-2026	Pharmacist	Verifies and dispenses prescriptions.
a.nada	Demo-2026	Pharmacist	Verifies and dispenses prescriptions.
k.yousif	Demo-2026	Cashier	Works the till; no clinical or back-office screens.
r.mona	Demo-2026	Cashier	Works the till.
h.idris	Demo-2026	Accountant	Vouchers, periods, payroll.
s.amal	Demo-2026	HR & administration	Attendance, leave, appraisals.
f.omar	Demo-2026	Pharmacy assistant	Receiving and counts.
t.huda	Demo-2026	Pharmacy trainee	The newest pair of hands.
c.bushra	Demo-2026	Clerk / data entry	Catalogue and documents.

Change these

The sample passwords are printed here on purpose — they are for evaluation. Create real users with real passwords before going live.
